

GUIDE TO SOCIAL DISTANCING

HOW TO OPEN & BE COMPLIANT

SOCIAL DISTANCING

Tents, shelters and personal barriers will play a critical role as **America** begins to re-open.

As we enter the next phase, challenges will be met head on as you try to keep your employees and customers safe. These ideas should help every business with following the social distance guidelines, and being able to make the most out of what can be done with outside spaces. Anchor's guide to social distancing will be a great asset for your community in the next few weeks to months. Not only renting tents but equipment as well.

DINING DIVIDERS™

DINING DIVIDER BY ANCHOR – SOCIAL DISTANCING SOLUTION

A perfect solution for one of the industries that has been hit the hardest - hospitality. The Dining Divider is made to help separate patrons from one another and promote social distancing. It comes in two versions, deluxe and standard. Both versions feature a cathedral window to be separated, but not feel isolated. This is the ideal solution for restaurants and bars that are faced with reduced capacity issues and wanting to make their customers feel at ease when dining out.

DELUXE DINING DIVIDER:

- Keder Top
- Hemmed Edges
- Semi closed pocket at bottom
- Heavy wheighted pipe
- eyebolts for hanging
- 16 oz blackout fabric

STANDARD DINING DIVIDER:

- Pocket Top
- Raw Edges
- Pocket at bottom
- PVC pipe
- Holes for hanging
- Lightweight fabric

DINING DIVIDER FEATURES & BENEFITS:

- Engineered specifically to perform for the hospitality industry
- Adapts to virtually any configuration for more separation in open spaces
- Cathedral window design adds stylish elegance
- Easy to clean and store away
- Lightweight, temporary option to create barriers

DINING DIVIDER OPTIONS:

- Deluxe and standard options available
- Wide width measures 7'10" tall x 6'6" wide
- Narrow width measures 7'10" tall x 4'8" wide

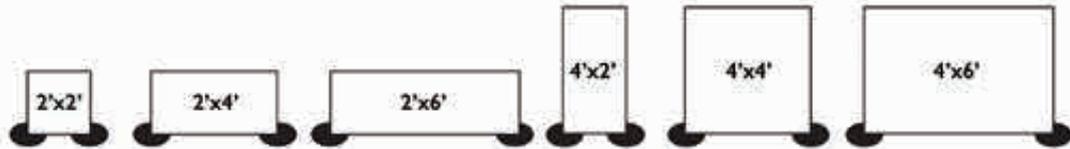

DINING DIVIDERS™

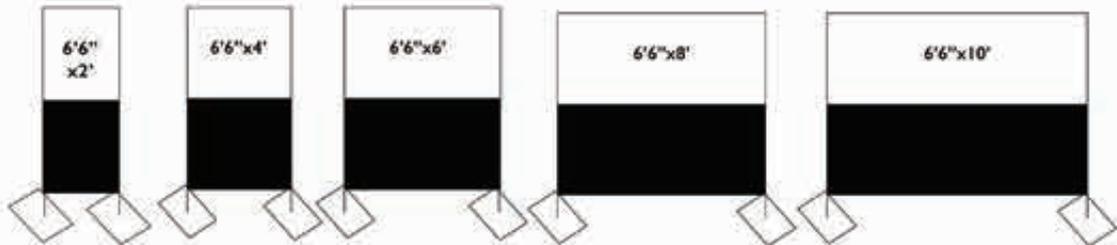

PORTA-SHIELDS™

SMALL

LARGE

Needing an extra wall to provide more separation? Porta-Shield was designed with you in mind. Featuring a clear vinyl barrier that allows you to feel safe without feeling isolated.

Porta-Shield comes in a variety of sizes to ensure that you have the best divider for your space. Sizes ranging from 2' x 2' to 6'6" x 10'. Small Porta-Shields are designed to sit on desks, counters, tables and workspaces. Large Porta-Shields are designed to sit on the ground and create barriers for lines, hallways and anything in between!

Porta-Shield Dividers feature a clear vinyl with pockets on all four sides. Securing the vinyl to the steel frame attached along with the sturdy base plates keeps the divider from tipping over. Along with taking up a minimum amount of room. This virtually break-proof design will not crack, split or chip making one of the top sellers on the market.

PORTA-SHIELD DIVIDERS & STANDS FEATURES & BENEFITS:

- Made in U.S.A.
- Easy to clean
- Sturdy
- Lightweight barrier
- Clear Vinyl
- Economical
- Designed to create a safe & healthy environment

PORTA-SHIELDS™

FRAMAZING

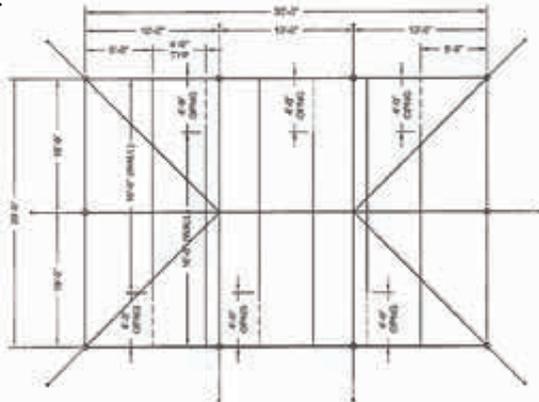

2.5 TIMES MORE PEOPLE CAN FIT IN THE SAME SPACE WHILE SEPARATED

How are individuals going to get into sporting events, airports, and concerts etc. without lines being insanely long if people can't be within 6 feet of one another? Anchor wants to help solve the problem of keeping protected while saving space.

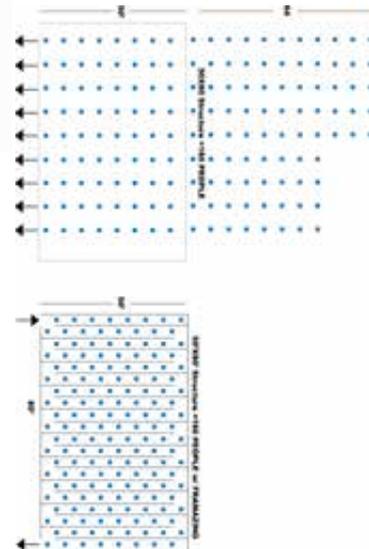

Framazing is an internal partition system that attaches to the inside of tents that creates a 7 foot tall maze dividers. Compared to a traditional line, 2.5 times more people can fit in the same space while remaining separated.

Framazing features clear vinyl top half so that people can see around them and a solid vinyl bottom half with 6 foot distancing markings found at the bottom. Attaching Framazing to any frame tent is made easy by securing the provided cables to the outside frame of the tent and using the tightening device provided to secure the Framazing wall in place.

FRAMAZING DIVIDER SYSTEM FEATURES & BENEFITS:

- Engineered specifically to distancing people in limited spaces
- Adapts to virtually any frame tent configuration
- With 6 foot separation it allows 2.5 times more people within a space versus a traditional line
- Easy to assemble
- Lightweight, temporary option to create a maze divider underneath a tent

RESTAURANTS

CONFIGURATION IDEAS

20' x 30' Navi Lite Pavilion

30Wx60 Navi-Trac

20x20, 20x30, 20x40 Fiesta

- **Placing a tent in a restaurant parking lot can expand seating capacity while keeping social distancing guidelines**
- **Adding Fiesta Marquees is great for guests who are waiting in line to enter or for pickup orders**
- **Create additional kitchen space with a tent close to the kitchen for an outside food prep area & help encourage distancing**

There are many different applications for tent solutions when it comes to restaurants. For a fast food restaurant or a place that primarily does take out, it might be valuable to add a small tent or canopy in the parking lot to cover up employees taking food out to patrons. Adding a Navi-Trac Lite Pavilion is a great way to add coverings to patios and courtyards because it connects directly with the building. If a restaurant doesn't have room for a tent for seating guests, encourage them to consider adding a small tent right outside the entrance for a hostess table so that they can control the number of individuals entering the building.

RESTAURANTS

Keep In Mind:
Depending on where a tent is set up, they might need extra lighting, flooring and tables. Let them know that you can provide this if it's needed.

BARS, WINERIES & BREWERIES

CONFIGURATION IDEAS

20 x 40 Navi-Trac

30 x 60 Navi-Trac

40 x 80 Navi-Trac

Local wineries and breweries don't always have very large spaces for tastings. Adding a tent could be a great way for patrons to get together and taste test their favorite beverages. Also consider a restaurant that wants to convert their bar area to dining room only to try fitting more patrons into their restaurants while social distancing guidelines are still in place.

BARS, WINERIES & BREWERIES

Adding a bar or cocktail tent right outside of the restaurant might appeal to a business owner that is trying to turn around tables inside faster.

CAFETERIA

BARS, WINERIES & BREWERIES

EXPANDED KITCHEN AREA

WINERIES

Hopefully the wait to get into an establishment goes quickly, however keeping your customers shielded from the sun and rain will make waiting a little more comfortable.

You can use numerous different tents to accommodate what your building would need.

FAST FOOD & TAKE OUT

Encouraging people to use a drive-thru or to-go orders pick up stations will keep your dining area and waiting area less congested and will help you better follow social distancing guidelines.

FACTORIES & OFFICES

20 x 40 Navi-Trac

30 x 60 Navi-Trac Lite

40 x 80 Navi-Trac

10M x 30M Venue

▪ **Break Rooms** ▪ **Dining Areas**
Office Space

Large tents in parking lots can be a great solution for manufacturing facilities and large corporations that are headed back to work and need to comply with social distancing guidelines. Asking businesses if they have a need for additional break-room space or dining areas. Maybe they have too many desks that are in close proximity and need more office space.

KEEP IN MIND:

Additional items such as flooring could also be rented. Do not limit yourself to just tents.

CHURCHES

CONFIGURATION IDEAS

40 x 60 Century

80 x 200 Century

10 x 10 Fiesta

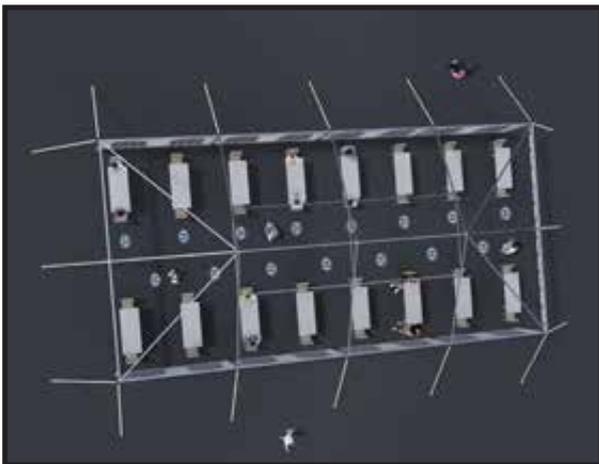

20 x 20 Century Frame

There are a few different ways that social distancing measures can be taken when it comes to church services. A large tent could be set up with chairs set up in groups of 5 or 6 to allow for families to sit together and distanced from others according to guidelines. This would likely provide a lot more space for individuals over traditional pew type seating.

Another way church services could be conducted is have a smaller tent or two set up in a parking lot and people can listen to a service much like they would a drive in movie or bring lawn chairs to join in on the service while socially distanced outside.

CHURCHES

Keep in mind:

A church might need chairs or sound system to be heard over a larger area. Let them know if you have solutions to make it a easier adjustment. Ask them if they are planning on having a social or fundraiser this year and see if there are ways to help with those events as well.

SCHOOLS & UNIVERSITIES

CONFIGURATION IDEAS

30Wx60 Navi-Trac

40Wx80 Navi-Trac

18M x 30M Venue

Fall Semesters might look a lot different in the coming school year. Schools might want to consider tents as temporary classrooms allowing students to spread out over a larger area than the typical lecture hall. A possible configuration is 8' conference tables with a chair on each end facing the professor. There is likely to be some type of need for screening tents to get into school events and sporting facilities to ensure the health of the students.

SCHOOLS & UNIVERSITIES

***STANFORD UNIVERSITY renting tents to open at
FULL CAPACITY FALL 2020***

PRO TIP: Larger universities are likely to start planning early for this.

SCHOOLS & UNIVERSITIES

We have a tent for your every need no matter the size. Restaurants to schools, along with summer camps and government buildings, a tent can take social distancing to the next level.

Allowing for more capacity while everyone struggles adjusting to the “new normal”

GROCERY STORES

CONFIGURATION IDEAS

20' x 30' Navi Lite

30Wx60 Navi-Trac

40Wx80 Navi-Trac

40x60x10 (shown in picture)

- **Cover sidewalk & entrance lines with marquees**
- **Curbside pickup**
- **Tents in the parking lot for farmers marketing & produce stands**
- **Employee break space**

Grocery stores are busier than ever. Give them a call to see if you can provide any solutions for them. This could be putting a marquee tent on their sidewalk to cover patrons as they wait in line to enter into the store. It could be a drive through lane for cars arriving for their scheduled grocery pickup and a queue line where workers can organize grocery orders waiting pickup.

Keep in mind:

They might need other rental items such as tables and chairs. Make sure to let them know that you have other items in your inventory that might be beneficial.

RETAIL STORES

CONFIGURATION IDEAS

20 x 40 Navi-Trac

10 x 10 Century Frame

Retail stores can vary vastly in size. Large chains are going to have a much bigger area to place a tent than retail spaces that are located in a strip mall. Depending on the size and type of store they might have various needs.

- Covering sidewalks leading to store entrance with marquee tents
- Using tents to create ingress and egress to help promote social distancing
- Using tents for order pickup areas
- Tents outside of strip malls to display inventory outside of a small or narrow store

RETAIL STORES

SUMMER CAMPS

CONFIGURATION IDEAS

40 x 80 Navi-Trac

40 x 100 Century

Summer Camps might be looking for some additional covered space for camp activities or crafts. It would be especially beneficial for rainy days. You could encourage counselors to section the tent into 20 x 20 activity pods to encourage social distancing among the campers.

SUMMER CAMPS

FUNERALS

CONFIGURATION IDEAS

20 x 30 Century Frame

30 x 30 F3

Not an idea that anyone wants to be a reality; setting up tents for funerals or receptions might be the only way for some to meet social distancing guidelines and say goodbye to their loved ones.

This could simply mean having a funeral reception or luncheon under a tent to ensure there is enough space, or creating a drive thru type scenario to allow for people to say their goodbyes while remaining distanced from others.

CAR DEALERSHIPS - SIGNING

CONFIGURATION IDEAS

20 x 30 F3

30 x 30 F3

Create an outdoor sales closing area with a tent for car dealerships. This could be done by placing a small desk under a tent with a chair on each side and a clear divider.

KEEP IN MIND:

Don't limit yourself just to tents, ask if they need chairs or other items from your inventory.
